INTERNSHIPS DEC 2025

MERN Stack Intern at CodeHub Nexus, developing full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Built RESTful APIs, implemented CRUD operations, and designed responsive user interfaces while collaborating using Git/GitHub. Focused on debugging and optimizing applications to improve performance and user experience.

PROJECTS

TrailBliss – Travel & Tourism Booking Platform GitHub JUNE 2026

Developed a full-stack travel and tourism web application using the MERN stack (MongoDB, Express.js, React.js, and Node.js). The platform enables users to explore destinations, browse tour packages, and make bookings through a responsive interface. Implemented secure authentication, package management, and booking functionalities using RESTful APIs.

SmartCivic – Urban Issue reporting and resolution platform GitHub APR 2026

Developed SmartCivic, a web-based platform for efficient civic issue reporting and management, enabling users to register complaints and track resolution status. Built using React.js, Node.js, Express.js, and PostgreSQL, implementing scalable backend services and responsive user interfaces.

MedFind – Medicine Availability Finder GitHub DEC 2025

Developed a full-stack web application using the MERN stack (MongoDB, Express.js, React.js, Node.js) that helps users search for medicines and locate nearby pharmacies with available stock. The platform provides a responsive React interface for medicine search and displays pharmacy details in real time. MongoDB is used to manage medicine inventory and pharmacy data, enabling faster access to essential medicines during emergencies.
